

Chenguang Yang

Tel: 626-713-4274 | Email: cyang314@ucr.edu

EDUCATION

University of California, Riverside

- *Ph.D. in Applied Statistics*

09/2024 - Present
Riverside

Syracuse University

- *Master of Science in Computer Engineering*

08/2019 - 05/2021
Syracuse

South China Agricultural University

- *Bachelor of Engineering in Electronic Science and Technology*

09/2014 - 06/2018
Guangzhou

RESEARCH INTERESTS

Deep learning, large language models (LLMs), multimodal learning, graph deep learning, transfer learning and spatio-temporal prediction.

PUBLICATIONS

Liang, P., **Yang, C.**, He, Y., Pan, R., Chen, Y. (2026). Topology-Guided Graph Pre-training and Prompt Learning on Directed Graphs. *Transactions on Machine Learning Research (TMLR)*.

Liu, Y., Wang, K., **Yang, C.**, Gel, Y., Chen, Y. (2026). TEN-DM: Topology-Enhanced Diffusion Model for Spatio-Temporal Event Prediction. *Proceedings of the International Conference on Learning Representations (ICLR)*.

Liu, Y., Chan, S., Chu, J., Zhang, Y., **Yang, C.**, Wang, Z., Gel, Y. R., Chen, Y. (2026). Multi-Modal Enhanced Graph Transfer Learning for Digital Finance Fraud Detection. *Proceedings of the ACM Web Conference (WWW)*.

Alizadeh, J. M., Zheng, G., Tan, C. C., Chen, Y., Martinez, O., McCallion, P., Ding, Y., **Yang, C.**, Tomosky, A., Wu, H. (2026). DreamKG: A KG-Augmented Conversational System for People Experiencing Homelessness. *IEEE International Conference on Healthcare Informatics (ICHI)*.

Jiao, D., Shao, Y., Guo, X., Lin, Z., Fei, J., **Yang, C.**, Chen, Y., Wu, H. (2025). Pathological Complete Response Classification on HER2-Positive Breast Cancer Patients with Double-View Graph Contrastive Learning. *The IEEE/ACM International Conference on Connected Health: Applications, Systems and Engineering Technologies (CHASE)*.

WORKING PAPERS

[Under Review] Fan, X., **Yang, C.**, Shi, F., Chen, Y., Li, B., Gel, Y., Cao, L. RIFT: Rectified Log-Intensity Flows for Temporal Point Processes.

[Under Review] Rozenblit, J., **Yang, C.**, Liu, Y., Chen, Y., Gel, Y. Graph Representation via Elements of Discrete Morse and Cobordism Theories.

[Under Review] Zhang, Y., Rozenblit, J., **Yang, C.**, Goel, J., Gel, Y., Chen, Y. MCM-DM: Towards Better Spatio-Temporal Event Representation Learning via Discrete Morse Theory.

[Under Review] **Yang, C.**, Xie, R., Goel, J., Dongre, P., Gao, X., Gel, Y., Chen, Y. To Trim or Not to Trim: Compressing Large Language Models with Zigzag.

[Under Review] Chen, Y., Zagvozdkin, A., LaHaye, N., Lee, H., Schilling, L. A., Hall, R. D., Gel, Y. R., Panta, A., **Yang, C.** WKGBot: Knowledge Graph-Driven Chatbot for Wildfire Risk Assessment.

ACADEMIC SERVICES

Reviewer: Conference on Neural Information Processing Systems (NeurIPS), 2026.

Reviewer: International Conference on Machine Learning (ICML), 2026.

Reviewer: The ACM Web Conference (WWW), 2025.

Journal Reviewer: Environmental Data Science, Cambridge University Press, 2025.

WORK/INTERNSHIP EXPERIENCES

Suzhou Zhito Technology Co., Ltd.

11/2021 - 06/2024

Software Development Engineer

- Served as a core developer for communication middleware systems for autonomous truck platforms.
- Designed and implemented middleware components supporting IPC, shared memory, TCP/UDP, and Unix domain socket communication.
- Developed Python-based testing scripts and supported software compilation, deployment, smoke testing, and CI/CD validation.
- Built platform health management and state management modules to monitor timing constraints, execution logic, and system-level runtime status.

Shandong New Ocean Software Co., Ltd.

11/2018 - 01/2019

Intern

- Systematically enhanced the ability to apply C++ to fulfill programming tasks;
- Assisted in the preliminary design of each project, and brainstormed with other team members to propose creative

ideas concerning the design scheme.

TECHNICAL SKILLS

Programming: Python, C++, SQL, R, MATLAB, Java

Machine Learning: PyTorch, graph neural networks, large language models, multimodal learning, temporal point processes, diffusion models

Scientific Computing: spatio-temporal modeling, graph algorithms, statistical modeling, neural operators

Systems: Linux, Git, CI/CD, TCP/UDP, Unix domain sockets, shared memory, middleware development
